Dceased dc comics wikipedia

Continue with the latest daily buzzing with buzzfeed daily newsletter! If you're a fan of DC Comics (NYSE:TWX) and love watching your favorite characters on the big screen, there seems to be no better time than now. While Marvel (NYSE:DIS) has set the bar high when it comes to success with comic book properties, Warner is set to arrive on the scene in a big way over the next few years. While the big news in recent weeks is that Batman and Superman will finally share the silver screen in the Man of Steel setting for release in 2015, that seems just the beginning. If it wasn't for the epic implosion on the scale of Batman and Robin, we could have entered the golden age of DC Comics, which appears on the big screen. And it's not just the characters of the Justice League. Here are six interesting DC Comics features that will be able to hit the screen in the next few years. Some are more or less set up, others are not so much. Check them after the jump. 1. Flash flash is a superhero with super speed power, including the ability to move extremely quickly with super-popular reflexes. The character first arrived on the scene in 1940 and was last seen on the animated series Justice League and Young Justice. In 1990, there was also a short-term live TV series, squealed by John Wesley Shipp. In fact, there are two media versions of the flash set that will appear in the next few years: one in a TV series and one in a movie. However, Warner Bros. make it clear that they are independent of each other and that the performance of the TV series, which is expected to arrive earlier than the film, will not affect the decision to push the film version into production. The television version of Flash is first set to appear on the second season of the CW's Arrow – which itself is the DC Comics franchise based on Green Arrow. CW President Mark Pedowitz explained: 'We plan to introduce Barry Allen's recurring character, which is The Flash. He continued: 'We're planning an origin story and we'll see how it goes. We want to expand into the DC Universe and we thought it was a very organic way to get there. In fact, Flash's role on The Arrow will serve as a pilot for a potential TV series in the role of superhero. There is also a film version of Flash in the works, which has much less available information. We know that Greg Berlanti, one of Arrow's co-creators and executive producers, is developing a movie for Warner Bros. and DC Entertainment with a potential release in 2016, but with its potential TV series there is no cross-point of view of the film. 2. Justice League (2017) Warner Bros. For more than a decade, he's been watching a potential Justice League movie, and it seems that Marvel's success with the Avengers, along with Warner's recent success with the Dark Knight trilogy and Man of Steel, has finally forced the studio into action. Among the original members of the League of Justice are Superman, Batman, The Martian Green Lantern, Wonder Woman, Aquaman and Flash. With the exception of Henry Cavill and Ben Affleck as Superman or Batman, we don't know too much about this movie, except for the fact that Warner Bros. is. 2017. However, Affleck's recent casting as Batman has led many Hollywood insiders to believe that casting choice brings the unlikely possibility that Affleck comes in as a director. While Affleck hasn't done a big budget action tent like Justice League, his recent directorial outings Argo and The Town show that he has chops for it, with a critical momentum. Of course, after the Avengers earned \$1.5 billion in a \$220 million budget, it became clear to anyone who would accept this work that there was a lot at stake. The Justice League film could define a career - either in a positive or negative way. 3. Justice League Dark In one of the most interesting features to potentially come from the DC Comics universe, director Guillermo del Toro took to the film adaptation of Justice League Dark – the latest comic-book team-up that combines some of D.C.'s more rude, dark, and supernatural qualities and characters. Originally titled Heaven sent to Del Toro's pitch in Warner Bros., the film is now titled The Dark Universe and there seems to be a lot of information about the potential movie despite it not yet being green-lit - something that should be good for fans. A possible adaptation of Justice League Dark could include the likes of The Swamp Thing, The Etrigan Demon, Deadman, Constantine, Zatanna and others. Del Toro says he is interested in building an alternative DC Comics mythology that is far less well known than popular properties like Superman and Batman. My most precious love was Constantine and I love Zatanna, Destiny, the whole mythology. That's why we're dealing with a really rich mythological environment, he told the Screenrant website. As interesting as it sounds, we'll have to wait at least a few years before this project is realised, given that Del Toro is currently in the process of working to produce on his horror film Crimson Peak. But given his enthusiasm for the project in recent years, we can only hope that these lesser-known properties will get a chance to shine. 4. Y: The Last Man Y: The Last Man is a dystopian science-fiction comic book series in which every male mammal on Earth died at the same time, except for escape artist Yorick Brown and his pet monkey. The event is called plague, which somehow erases every mammal with the Y chromosome. In an interview with Crave Online last June, Goyer said: We have a scenario that is as close as it's ever been. [Y: The Last Man] could go into production next year.... The first film is supposed to act as a stand-alone, but Continue. Hopefully there will be others, Goyer said. In January, it was announced that Dan Trachtenberg, who impressed with the short SCI-fi film Portal: No Escape in 2011, was set to direct, although there was not much more information. To find this under perhaps, like Y: The Last Man seems one of those movies that are destined to stay in developmental hell. 5. Fables Fables is a comic book series that accompanies famous fairytale and folk-fairy-tale characters such as Cinderella, Snow White and the Great Evil Wolf, who were thrown out of their worlds and now live in a small pocket of New York City. The comic has been a target for Warner Bros. for some time. In 2004, Warner went so far as to go into development with Jim Henson, but he failed to move across the writing stage. Fables appears to get a second shot with the director of A Royal Affair, Nikolai Arcel, at the helm and a screenplay written by Jeremy Slater. The producers include David Heyman and Jeffrey Clifford of Heyday Films, who stood for the Harry Potter films. 6. Sandman Sandman is an example of a property that will certainly get a film deal – the only question is when. Since 1990, on Warner Bros. While there's not much concrete news at the moment about a possible Sandman film adaptation, DC Entertainment President Diane Nelson told The Hollywood Reporter that Neil Gaiman's Sandman is her top choice for the real estate she'd most like to get on screen. With such enthusiasm at the top of DC Comics, it seems only a matter of time before anyone takes cover. Like us on Facebook to get the latest from Wall St. Cheat Sheet right in your news feed. Don't miss:6 New movies to watch this weekend. DC has some of the most famous comic characters of all time. They have what is known as the trio of comic characters – Superman, Batman and Wonder Woman. With these three characters, DC has the first superhero in Superman, a hero with the top comic book movie of all time in Batman and the best known female hero in Wonder Woman. Add to this a classic list of other characters and you can see why DC has become known as one of the Big Two. See which DC characters made the cut in the top DC comic book of all time superheroes. Superman is without a doubt one of the most famous superheroes in the world. It's recognizable in so many places where there's not even a comic book to sell. He is one of the first superheroes and his debut is constantly making records at the auction house with no signs of stopping. Not only is he the best superhero of all, but he's easily by far the best DC superhero. Fans love Batman. Maybe it's the fact that he's a normal person and he's still saving the world that people come across in the world. His films are filming blockbusters and he's chipping away for the best place on the DC list. Batman is dark, mysterious and full of courage – which firmly puts him near the top. Wonder Woman is the most famous female superhero. She had a long-running television show, cartoon appearances and her own comic book title. Wonder Woman has turned into a figure larger than a comic book, becoming a symbol of women's rights. Although there are many green lamps in the DC universe, Hal Jordan – the green lamp of sector 2813 – is the most powerful of all. He's the best lanterns can offer and he's saved Earth time and time again. The D.C. universe would be a bleak place without the Green Lantern, but in recent years it has risen into the ranks of DC's elite. The fastest living man is the king of the speed force and is one of DC's best heroes. Even though he has enormous power, he's still a very ordinary man, and maybe that's why a lot of people identify with him. Flash is a hero who is repeatedly placed in DCU and very much deserves his place. Although Captain Marvel can't use his name on the DC comic, he's still a well-known and beloved character in the DC universe. Almost as powerful as his fellow Superman, he is a juggernaut in DCU and the one you call in your darkest hour of need. Although he is still technically regarded as batman's assistant, and although some may see him as in the shadow of his mentor, Robin has proven himself to be something much more than that. He is the leader of his hero team at the Teen Titans and has had his title. There were a lot of Robins, but the character is definitely more than the sum of his parts. The Green Arrow may be a character from another era, but he's still certainly one of DC's main heroes. The Green Arrow is a crack shot with a bow and arrow and is a grizzly veteran of many D.C.'s global battles. When you've only got one shot, you call the Green Arrow to do it. He was once batman's assistant, but he soon overheaded his uniform and branched himself out. Not only did Nightwing succeed, but he became a great figure in his own right. The Swamp Thing is certainly one of the most recognizable horror comics out there. A lot of top writers have cut their teeth on this character, and many more want to write and draw it still. Swamp Thing is one that will continue to mystify and thrill its fans all over. Jonah Hex is without a doubt one of the top Western characters in the comic book. He is a dark and beautiful character, born of blood and bullets, and always gets his man. He knows his life is likely to end in violence, but it doesn't matter to him. Hex will face it when the time comes, and in the meantime, all he wants is cheap whiskey and a fine woman. Superman's cousin, Supergirl is formidable to her own. It is a truly beloved part of DCU, even if the character has been badly oversheed in recent times. Supergirl is a great part of Superman myths and continues to grow like her Significance. Significance.
